PROJECTS

Simple Online Banking System

The Online Banking System is a Java console application that allows users to perform basic banking tasks and provides an admin interface for managing accounts. Users can register, log in, check their balance, deposit money, withdraw funds, transfer money to other users, and view their transaction history.

AI Powered Helmet Detection System using YOLO

Developed an AI-powered Helmet Detection System using YOLO (You Only Look Once) object detection algorithm, leveraging deep learning techniques to accurately identify and classify helmets in real-time images or video streams.
